RAISING THE BAR FOR HEAVY CONSTRUCTION SERVICES

TAILORED SOLUTIONS TO SIMPLIFY YOUR JOB

Irving Equipment is Atlantic Canada's largest provider of crane rental, heavy lifting, specialized transportation, deep foundations and project management services. Let us tailor a heavy construction solution that's right for you.

With our in-house engineering, custom technology and extensive crane fleet, we can take on your biggest challenges and get the job done—on time and on budget.

In business for more than 50 years, we specialize in industrial, commercial, infrastructure and residential projects. One of the biggest benefits of working with Irving Equipment is gaining access to an exceptional workforce, experienced operators, and our talented team of in-house engineers. Our employees set the standard for solving complex problems efficiently and affordably. Whatever your needs, they'll get the job done.

As a customer of Irving Equipment, you'll be able to count on us to take the extra step towards preserving the environment. As one of the only crane companies to be registered ISO 14001:2004, we make sure our cranes are maintained to meet those standards.

FLEET

Our extensive, modern, reliable equipment fleet includes over 140 cranes ranging from 8 to 825 tons in capacity. This makes us one of the only full line crane suppliers in the region and ranks us in the top 30 on the ACT50 list for lifting capacity in North America.

Our current fleet consists of:

- Carry Deck Cranes up to 22 ton
- Boom Trucks up to 50 ton
- Rough Terrain Cranes up to 130 ton
- Hydraulic Truck Cranes up to 500 ton
- Crawler Cranes up to 825 ton

RIGGING

You can be confident that we deal with only the leading manufacturers and purchase only the best quality rigging. Every piece is safety certified on a regular basis to ensure the highest safety standards. As well we maintain a lifetime documented history for each piece, tracking when it was used and what it was used for. This information is stored in an online database accessible around the clock.

SPECIALIZED TRANSPORTATION

We have the experience and expertise when it comes to over-dimensional loads. Our hardworking fleet of multi-axle transport modules is able to move loads as large as 1000 tons. We also have our custom transportation logistics software that will plot a precise driving route for those congested or difficult to maneuver sites.

DEEP FOUNDATIONS

At Irving Equipment we provide innovative solutions to your Deep Foundation requirements. Our diverse fleet of Cranes and Pile Driving equipment enables us to be responsive to demanding projects, regardless of size or complexity. Our team has the focus and experience for demanding and fast-track construction projects.

We specialize in:

- Driven Piles
- Helical Pier Piles
- Friction Piling
- Sheet Piling
- Shoring
- Underpinning
- Tieback Anchors

HEAVY LIFT

No matter how large or complex your lifting project, you can count on us to provide a tailored solution that meets your goals. To maximize our safety and reliability, our supervisors and engineers will personally visit your job site to conduct on-the-ground assessments of every proposed lift. We have worked for 50 years to acquire the right equipment, experience and skills necessary to conduct your next heavy lift, effectively and efficiently.

PROJECT MANAGEMENT

Our project management group consists of our most experienced and certified engineers, technologists and superintendents. The project managers have handled some of the largest and most complex industrial projects in the region which has given them the experience and skills to plan, and tailor a solution for any job. With the support of advanced custom technologies, including computerized bidding, scheduling and cost-control software, they execute with precision and consistently provide the highest quality customer service.

ENGINEERING

Our talented team of in-house engineers sets the standard in providing efficient, practical solutions for even the most complex moving and lifting challenges. As a customer, you gain direct access to our engineering staff, who will work collaboratively with you to help you achieve your project goals.

To ensure your project receives the very highest quality of engineering service, we provide our team with ongoing training and equip them with the most up-to-date tools of the trade.

TECHNOLOGY

In 1987, Irving Equipment revolutionized the crane industry when we created the first three-dimensional lift planning system, now known as CraneCAD™. Over the past 20 years we have continually updated and adopted the technology to today's market, which has helped the software produce over 10,000 drawings.

Each of our supervisors and engineers are also equipped with hand-held computers which give them on-site access to crane and load charts to help determine the type of crane and the precise lift configuration required for each lift. When you combine these technologies with our creativity, trained and experienced operators, and well-maintained cranes, we can deliver the whole package for your project.
